

BEST FOR RENT A CAR AGENCY

OUR SUGGESTION FOR DOCUMENT PROTECTION

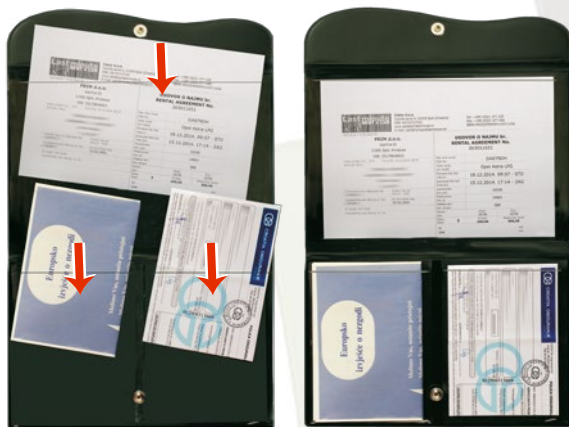

When renting, car rental companies must provide some documents to the client. Minimum documents the client should get from car rental companies are:

- license for a vehicle (registration card for the vehicle)
- rent contract,
- green card,
- insurance policy,
- european report for accident (just in case)...

We produce ideal folders for keeping these documents.

All these documents have to be in the client's possession for the entire duration of the car rental. So these documents the client must keep in something. This folder is the ideal product for that purpose.

When a client rents the vehicle, the sales agent simply puts all of these documents in the folder and gives it to the client, nice and neat.

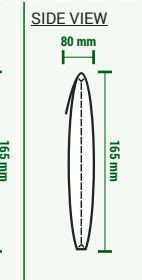

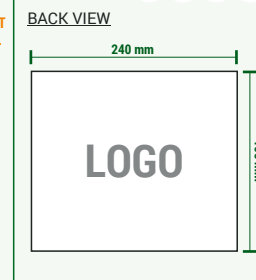

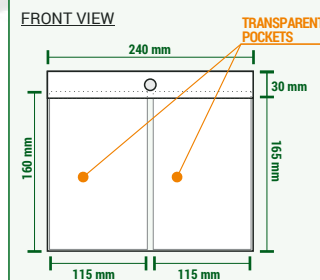

3dimensional folder

- Easy to handle & Practical...
